

Kenneth Tiemroth

IT Director - Cloud & Security Leadership

Copenhagen, Denmark · kenneth@veringtiemroth.dk · linkedin.com/in/kennethtiemroth · veringtiemroth.dk

PROFILE

IT Director with 25 years in infrastructure and security, the last decade in SaaS. At Omada, a global Identity Governance vendor, I run the cloud and security stack: Azure, Microsoft 365, Entra ID, Intune, and SASE. The same stack carries five consecutive ISO/IEC 27001 recertifications and three SOC 2 Type II audits with zero critical findings. I stay technical: I build the controls, lead the team, and report to the business.

KEY HIGHLIGHTS

- Moved global operations to Microsoft Azure, ending on-premises server dependency
- Five ISO/IEC 27001 recertifications and three SOC 2 Type II audits with zero critical findings
- Rolled out global SASE platform via Cato Networks
- Implemented Conditional Access, MFA, Intune Security Baselines, and Omada Identity Cloud
- Rebuilt the helpdesk function. NSAT scores have stayed above 98% across 300 users
- Hands-on contributor to annual penetration testing programme in cooperation with CISO
- Set up Azure cost governance: tagging, rightsizing, reserved instances, and reporting to finance and leadership
- Led distributed 4-person IT team across Copenhagen and Alicante

PROFESSIONAL EXPERIENCE

Omada | October 2016 – Present CURRENT ROLE

IT Director (2021 – Present) · IT Manager (2018 – 2021) · IT Specialist (2016 – 2018)

Progressed from IT Specialist to IT Director, leading IT operations, infrastructure, cloud, and security for a global SaaS vendor in Identity Governance.

- Architected and delivered the move from hybrid infrastructure to a cloud-first operating model on Microsoft Azure, ending on-premises server dependency across all locations.
- Drove infrastructure modernisation including Hyper-V platform improvements and scalability initiatives.
- Implemented key security and identity controls: Conditional Access, MFA, Intune Security Baselines, Azure AD / Entra ID, and Omada Identity Cloud.
- Owned all IT controls across five consecutive ISO/IEC 27001 recertifications and three SOC 2 Type II audits, with zero critical findings across 5 years of continuous certification.
- Hands-on contributor to annual penetration testing programme, coordinating remediation and reporting in close cooperation with CISO in support of ISO 27001 and SOC 2 compliance cycles.
- Rebuilt the internal helpdesk function. NSAT scores have stayed above 98% year on year.
- Set up Azure cost governance, covering budget alerts, tagging strategy, cost allocation, reserved instance decisions, and rightsizing, with regular reporting to finance and leadership.
- Rolled out global SASE platform with Cato Networks for secure, optimised access across all locations.
- Led and coordinated a distributed 4-person IT team across Copenhagen and Alicante, maintaining operational continuity across time zones.
- Manage the ~300-seat Microsoft 365 tenant including Exchange Online, Intune, Entra ID, and Defender. Responsible for tenant-level security policy, identity configuration, and service continuity.

Tech: Microsoft Azure · Hyper-V · Azure AD / Entra ID · Microsoft Intune · Conditional Access · MFA · Omada Identity Cloud · Cato Networks · Windows Server · PowerShell · SASE · ISO/IEC 27001 · SOC 2 Type II

Cryptomathic | January 2015 – September 2016

IT Operations / Infrastructure

Managed IT operations and support for the Aarhus HQ and satellite offices in Cambridge, Munich, and San Jose.

- Led migration from on-premises Exchange to Microsoft 365.
- Oversaw implementation of new infrastructure including Hyper-V hosts and SAN storage.
- Rolled out Meraki MX-based VPN solution strengthening secure connectivity across offices.

Tech: Microsoft 365 · Hyper-V · VMware · SAN Storage · Meraki MX · Windows Server · Active Directory

Systematic | August 2013 – December 2014

Infrastructure Support Consultant

Supported IT infrastructure for the Admiral Danish Fleet in a high-security environment near Aarhus, requiring active Danish security clearance.

- Held active Danish security clearance. Supported two mission-critical naval systems and contributed to the full reconstruction of IT infrastructure on HDMS Esbern Snare.

Tech: Windows Server · VMware · Cisco networking · Secure VPN · ITIL-based processes

Earlier Career

Plougmann Vingtoft · IT Support / Infrastructure · Dec 2006 – Jul 2013

Helpdesk, user administration, and infrastructure maintenance. Improved internal processes and contributed to infrastructure roadmap initiatives.

T-Systems / Jensen Consulting · Installation Consultant · Jan 1999 – Nov 2006

Long-term client engagements in IT operations, rollout, training, and end-user enablement. Key clients: Maersk Logistics, DSB S-tog, Ferring Pharmaceuticals, Nokia Danmark.

CORE COMPETENCIES

Leadership & Operations

Run IT operations as a function: team, budget, vendors, service quality, and reporting up to the business. Comfortable building and leading small teams that carry a wide scope.

Security & Compliance

Own the security controls behind ISO/IEC 27001 and SOC 2 certification. Practical experience across policy, hardening, penetration testing, remediation, and audit preparation.

Networking & Remote Access

Designed and rolled out global secure access on Cato Networks SASE. Comfortable with network decisions across multi-site, multi-country setups.

Cloud & Infrastructure

Design and operate cloud-first environments on Microsoft Azure and Microsoft 365. Hands-on with virtualisation, migrations, endpoint management, and ongoing cost governance.

Identity & Access

Long background in Microsoft identity: Entra ID, Active Directory, Conditional Access, PKI, and MFA. Extended into governance with Omada Identity Cloud for access lifecycle and compliance.

Delivery Style

Structured and hands-on. I prefer to fix the problem myself rather than hand it on, and I am still as comfortable in PowerShell as I am presenting to leadership.
